Login to the Applicant Tracking Module. Before changing the status of a candidate to **Recommend for Hire**, all applicants that are not selected for hire will need an updated status. To do this, complete the following steps:

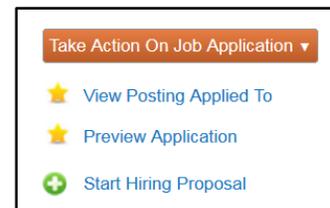

1. Load the posting from your watchlist (if flagged) or from the postings tab
2. From the summary page, click the **Applicant** tab
3. To move applicants in bulk, click the box beside the applicants name to select the applicants and then hover over the **actions** button. Select the option **move in workflow**.
4. Update the applicant’s status appropriately (e.g. **Approved for Interview, Not Hired**).
5. Enter the **Reason Code**.
6. Click **Save changes**.
7. Repeat for all applicants that are not selected for hire. For more information on applicant statuses, see the **Rating Applicants User Manual**.
8. If the position requires a background check, change the selected applicant’s status to **Send for Background Check**. This will initiate the background check screening process based on the position prescreening requirements as outlined in the posting.
9. Once the background check has cleared the applicants status will change to **Background Check Complete** indicating the applicant has cleared the prescreening. If the applicant did not clear you will be notified by HR and the applicant’s status will be changed to **Approved for Interview, Not Hired**.
10. If no background check is required, change the selected candidate to **Recommend for Hire, No Background Check**.
